## Souleye

### Verse 1

From the islands to the mountains /  
Where pioneers engineering /  
New sounds concurring /  
Bounce to the reflex itâ€™s alien music /  
Project new visions of light to the project /  
Professional fresh fusion sweet like a bowl fruit /  
Since the age of a little man /  
Like the first time a young girl gets a hula hoop /  
Older now big time organized plan /  
Get a van move down by the river man /  
Throw me a coconut, crack it open and drink it up /  
A bit herb mixed with spliff tobacco /  
Good for a sore back gotta keep it natural /  
True to the source blast off with some sassafras /  
Pat me on the backside / Iâ€™ll remember that /  
Itâ€™s an oracle, omen radical now heâ€™s an old man /  
And everythingâ€™s hysterical /  
Laugh a lot, keep the vibes high and beautiful /  
Itâ€™s a ritual to go and dance like an animal /  
Free your inhibitions and let your fears go /  
Wear funny clothes free your soul be a weirdo /  
Throw your television off the roof /  
Donâ€™t believe the hype propaganda that America feeds you /  
Theyâ€™ll bamboozle your babies with that trickery /  
Itâ€™s time to take a stand letâ€™s cultivate the seed /

### Hook

And letâ€™s dream of the day we call victory /  
Over stood underneath the bridge of imaginary /  
Thoughts that carry us on ward /  
On to the next day breath yeah verse of a song bird /  
And as it sings, you hear it unfold in the night /  
Another day that we are living /  
Awaken with all your might /  
It might be a hard road we face at times /  
Letâ€™s take away all the pain and ease our minds /

Allow the sun to shine and embrace the auspicious /  
Reprogram your thoughts Whereâ€™re on a Mission /

And letâ€™s dream of the day we call victory /  
Over stood underneath the bridge of imaginary /  
Thoughts that carry us on ward /  
On to the next day breath yeah verse of a song bird /  
And as it sings, you hear it unfold in the night /  
Another day that we are living /  
Awaken with all your might /  
It might be a hard road we face at times/  
Letâ€™s take away all the pain and ease our minds /

## VERSE 2

Wow yea looks at all these things /  
Whoever would have been able to go and guess /  
Bring me something new to the plate yea heâ€™s starving /  
For what attention / No man ascension /  
Oh yea heâ€™s new age /  
He metamorph / with that / ahhh  
Yep that is right / Rhyme with the after life /  
Satellites tracking our steps infect our rights /  
And if your hearing voices up inside your head /  
Who was that youâ€™re wondering / Did you hear what they said /  
They were speaking in a soft spoken un-know tongue /  
The evolution of chosen weather to stop or run /  
Rain thunder and hail never slowed me down /  
I went and edited my pros and then I found /  
Conversations that bound me then I broke free /  
And danced till the sun was up /  
Ahh yep a breath of fresh air /  
An amazing way to reflect /  
Cheers to another sip of some nice cold coconut milk /  
Thatâ€™s enough to get me feeling higher than Iâ€™ve ever felt /  
Mix it up with a little bit of green man /  
Every day Iâ€™m living Iâ€™m a think about burning man /  
And after hours when I love to be up on a mic /  
Iâ€™ve got song birds singing to me while in fight /  
Wild out freestyle the movement meditation its generating / Supanatural calm and composed with my phrase /  
Lifestyle lean on back enjoy the road /  
Iâ€™m in a daze for days now reciting these poems /  
let it be known why be a clone get up and be your own /  
Close your eyes and zone out but open the door /  
For people that you havenâ€™t even meet yet /

But I bet, one day who knows you might even be friends /  
With some one that you want to chill with this weekend /
