

Rolled In from the South

Josh Fix

Driving in the dark
Sailing though the fog
I lost my way a long, long time ago
Can't see the road
I don't even know
If I'm even close to where I wanna go
I can feel the sea
It's still moving me
And I've been on the ground for several hours now
Rolling with this crown
That covers everything
It's been with me since Texas and it ain't evenThe captain said today
Truck up all the way
Riding through the storm where
I left him at his house back in motion
Rolled in from the south
She's the other way I know
Bad moon in the sky
Feel it in the air
He knows I can't see him
But I know he's there
Laughing down on me
And my broken heart
It's been with me since Texas and it ain't evenOh yeah the captain said today
Truck up all the way
Riding through the storm where
I left him at his house back in motion
Rolled in from the south
Rolled in from the south
Rolled in from the south
Rolled in from the south
Rolled in from the south
Driving in the dark
Sailing though the fog
I lost my way a long, long time ago
Can't see the road
I don't even know
If I'm even close to where I wanna go
I can feel the sea

It's still moving me
And I've been on the ground for several hours now
Rolling with this crown
That covers everything
It's been with me since Texas and it ain't even Oh yeah the captain said today
Truck up all the way
Riding through the storm where
I left him at his house back in motion
Rolled in from the south
Rolled in from the south
Rolled in from the south
Rolled in from the south
Rolled in from the south
