

Everything Takes Time

Paper Lights

you would never know but
when relief was what you said
I couldn't feel my feet touch
you would never know but
when you held that final set
I saw reflections of myself
I felt forgiveness everything worth your time is waiting
everything here takes time
living this life like time is fading
everything here takes time when the fire took breath
left the valley and moved west
felt a flame build in my lungs
tension ignites use everything worth your time is waiting
everything here takes time oh oh oh everything worth your time is waiting
oh oh oh everything here takes everything worth your time is waiting
everything here takes time
living this life like time is fading
everything here takes time
