

Nightvision

Stepdad

You've got a passive aggression, with a need to get loud.
I've never seen you smile even once girl, and it's creeping me out. You've gotta shake, shake, shake me off,
shake me off your shoes.
You cannot be serious.
How can you be serious?
When you shake, shake, shake, me off.
What is your excuse?

We used to be in love, now all you do is harsh my buzz. If you wanna keep the covers on, hiding in the darkness
on your own, I've opened up my eyes, I've got night vision for you.
And if you push back against the light, It's gunna push you back to make it right.
I've cut you down to size, I've got night vision for you.
I could be up in the clouds girl, but you're bringing me down, bringing me down.
What could have been an early detection, was an easy way out, easy way out. You've gotta shake, shake, shake
me off, shake me off your shoes.
You cannot be serious.
How can you be serious?
When you shake, shake, shake, me off.
What is your excuse?
We used to be in love.

We used to be in love! If you wanna keep the covers on, hiding in the darkness on your own, I've opened up my
eyes, I've got night vision for you.
And if you push back against the light, It's gunna push you back to make it right.
I've cut you down to size, I've got night vision for you. I don't know why you even try, all you do is push back
the light. Keep trying to shake me off, keep trying to set me up, keep trying to throw me out, you tried but I
refuse.

What are you tryin' to do? If you wanna keep the covers on, hiding in the darkness on your own, I've opened up
my eyes, I've got night vision for you.
And if you push back against the light, It's gunna push you back to make it right.
I've cut you down to size, I've got night vision for you.
