

# Thing Called Love

## Above & Beyond

There was a time  
There was a place  
But there was fear inside  
A witty lie to save my face  
The parachute of pride  
To cross the line takes a tiny step  
But will this spark cause the bridge to burn  
My fear entwined with my regret  
I'll be the path for safe return So here we are  
All just the same  
But you will never know  
My secret plan  
How close we came  
To share another role  
I haven't lost my only chance  
To tell you how I feel inside  
Is it just me  
I'd like to know  
Or are we all just a little blind? There's a thing called love  
That we all forget  
And it's a wasted love  
That we all regret  
You live your life just once  
So don't forget about a thing called love  
Don't forget, forget about a thing called love There's a thing called love  
That we all forget  
And it's a wasted love  
That we all regret  
You live your life just once  
So don't forget about a thing called love  
Don't forget, forget about a thing called love
