

Somethin' 'bout Your Body

Firehouse

Ooh yea, well I really admire your political views
Your personal philosophy reflects your high I.Q.
And I am impressed by the way you think everything through
Baby you're so smart I know
That I could really learn a lot from you, yea you
Well you've got quite a brain but I've got half a mind
To show you what I want to do to you
With all respect your intellect takes a back seat this time
It's the physical attraction that turns me on
There's just somethin' 'bout you body
That makes me want you all the time
Oo, I want your body but all I get from you
Is a piece of your mind, there's just somethin' 'bout your body
And your body talk don't take no genius to see
The intelligent approach is gonna be most likely to succeed
Well I'm thinkin' about you, do you think about me?
I really feel I could fulfill your full mental capacity, yea
Well you've got quite a brain but I've got half a mind
To show you what I want to do to you
With all respect your intellect takes a back seat this time
It's the physical attraction that turns me on
There's just somethin' 'bout you body
That makes me want you all the time
Oo, I want your body but all I get from you
Is a piece of your mind, there's just somethin' 'bout your body
Somethin' 'bout your body, body talk
Well, you've got quite a brain but I've got half a mind
To show you what I want to do to you
With all respect your intellect takes a back seat this time
It's the physical attraction that turns me on
There's just somethin' 'bout your body
That makes me want you all the time
Oo, I want your body but all I get from you
Is a piece of your mind
There's just somethin' 'bout your body
That makes me want you all the time
Oo, I want your body but all I get from you is
A piece of your mind
There's just somethin' 'bout your body

There's just somethin' 'bout your body
That makes me want you all the time
Somethin' 'bout you body
Hey, hey, hey, hey, yea
