

S.I.X.

Zhaga

Fire bursting through your heart
Spread your wings and shake the ash
Flames will set you free,
Feel the sun ignites

Through the burning pain we drown
As we reach for the stars
Legends ride in heat
Feel the rage inside

Don't be afraid of what might come
remember who you are
don't ever quit your right to stand again and fight

Cry your name out loud,
And let your soul, become the wind
Fly and rise again
evoke your soul, become the wind

Ruling silence from above
Eternity won't last
As i come undone
Feel it's still alive

Shadows racing to defy
The gravity won't last,
Never doubt your light
Feel it through the night
