# Metalium

## Metalium

Confusion is getting clearer
The senses are numb
My eyes hurting from the bright shine
Reflecting the sunThe silhouette comes into focus
There stands the flask
This shiny chrome liquid helps
Complete the taskWhen I take it what will happen
It will set you free
Will it give me certain power
Fearless immortalityYou will be ready for the fight
Here me crying
You got to fight all through the night
I'm not dyingChosen by higher forces
Don't know what to do
Power from unknown sources
Make my dream come trueThe moment is getting closer
I'm feeling the strength
The other will be the losers
Beware my revengeDrink the liquid called Metalium
It will set me free
It will give you certain power
Fearless immortalityYou will be ready for the fight
Here me crying
You got to fight all through the night
I'm not dyingYou will be ready for the fight
Here me crying
You got to fight all through the night
I'm not dyingYou will be ready for the fight
Here me crying
You got to fight all through the night
I'm not dyingYou will be ready for the fight
Here me crying
You got to fight all through the night
I'm not dying
