

# Where Was I?

## Guttermouth

Advisory - the following lyrics contain explicit language:

Well, country's in the red  
Soon we'll be dead  
No life, not even a flower  
Cause atomic power  
Scares the shit out of you  
There's nothing you can do  
Undecided men  
Bout a war you can't winHey, who would want to win the damn thing anyway, right boys?Children turn green  
The flowers die  
All the people are gone except I  
The atom bombs have exploded near  
Where was I if I wasn't here?  
Atomic was one way out  
Nuclear was the final bout  
Atomic war can destroy our race  
Leave the Earth in all but wasteBut, where was IWhen the trouble started?  
Where was I when the two sides parted?  
Where was I if I wasn't here?  
Cause the atom bombs have exploded near  
But nothing's happened to me so...
