Good Planets Are Hard to Find

Steve Forbert

Good planets are hard to find
Temperate zones and tropic climes
True currents in thriving seas
Winds blowin' through breathing trees
Strong ozone and safe sunshine
Good planets are hard to findGood planets are in demand
Clean beaches and sparkling sand
Land masses with room to spare
Jet streams and perfect air
High forests and low wetlands
Good planets are in demandAnd the mind don't know
If the heart can't see
Let the blind man go
To his destinyGood planets are rare indeed
Rain fallin' on crops and seed
Big rivers and good topsoil
Fuel sources from cane to oil
Green gardens of all we need
Good planets are rare indeedAnd the mind don't know
If the heart can't see
Let the blind man go
To his destinyGood planets are scarce and few
Earthworms and caribou
Strong food chains and tasty meals
Textiles and plants that heal
Iron mountains and skies of blue
Good planets are scarce and few
