Blues Jam

Pearl Jam

They always pry
They always want to know why
You'll burn so deep inside
And then they pull you in
And then you want to dieAnd then it gets on top of you
Believe me when I tell you
It won't let you go
It'll crush itLife will not break your heart
You never felt so good
And the bleeding will never end
You never felt so well
And then you open your heart right upAnd then that's when you stop breathing, man
Heart smasher
And say come on in
Knives in your mind
