Dr. Carter

Lil' Wayne

Where's my coffee?
Good morning, Dr. Carter
Hey sweetie, looks like its going to be a long day
Ah, another one uh, what we got?Your first patient, yeah, is suffering from a lack of concept
Uh huh, originality, ugh, his flow is weak
Another one and he has no style, ugh
Whatcha got for um?Okay, let me put my gloves on and my scrubs on
Dr. Carter, to the rescue, excuse me if I'm late
But like a thief it takes time to be this great
Ha, so just waitYour style is a disgrace, your rhymes are fifth place
And Im just grace, one, uno, ace
And Im tryin to make your heart beat like bass
But youre sweet like cakeAnd I come to fix whatever you shall break
Where is your originality, you are so fake
So picture me like a gallery, capture what I say
All I need is one mic, all I need is one takeLike hey, brighter then the sun ray
Got a pistol on the playground, watch the gunplay
Like, no kidding, no kids in the way
But the kids do watch, gotta watch what we sayGotta work everyday, gotta not be clich
Gotta stand out like Andr 3K, gotta kick it, kick it like the sensei
You gotta have faith, you gotta, gotta wait, wait
I think I, think I lost himDial 118 please
Good afternoon Dr. Carter, nurse
I don't know about this one, his confidence is down
Vocab and metaphors needs work and he got no respect for the game
Ah, let me see, you think you can save him?Okay, respect is in the heart, so thats where I'ma start
And a lot of heart patients don't make it
Now hey kid plural, I graduated
Cause you could get through anything if Magic made itAnd that was called recycling or re-reciting something
Cause you just like it, so you say it just like it
Some say its biting but I say its enlightening
Besides Dr. Kanye West is one of the brightestAnd Dr. Swizz can stitch your track up the tightest
And Dr. Jeezy can fix your back up the nicest
Arthritis in my hand from writing
But Ima doctor they don't understand my writingSo I stop writing, now Im like lighting
And you ain't Vince Young so don't clash with the Titan
Fast and exciting and my passion is frightening
Now, let me put some more vocab in your I.V.Here, take this Vicodin, like it and love it
And confidence has no budget

So pay me no mind, I don't walk like I talk it cause Im running
I don't do it cause I done it and I'm in the emergency on itGoddammit, Ive lost another one
Good evening Dr. Carter, its been a long day
But this one looks much better then the others
His respect is back up, concepts sound goodHis style is showing strong signs of improvement
All he needs now is some swagger
Okay, let me take my gloves off thenSwagger tighter than a yeast infection
Fly go hard like geese, erection
Fashion patrol, police protection
I stay tight like Chinese connectionI stay tight like pussy at night
Baby, don't get me wrong, I could do that pussy right
But Im too wrong to write, too fresh to fight
Too paid to freestyle, too paid to freestyleI had to say it twice, swagger so nice
And don't ask me shit unless it concern a price
And I don't rap fast, I rap slow cause I mean every letter
In the words in the sentence of my quotesSwap it just flow sweeter then honey oats
That swagger I got it, I wear it like a coat
Wait as I put the light down his throat
I can only see flow, his blood starting to flowHis lungs starting to grow
This one starting to show strong signs of life
Wheres the stitches? Heres the knife
I smack his face, his eyes open, I reply with a night
Welcome back hip hop, I saved your lifeHe looks good, his vitals are up
He's looking good, he's looking good
I think we got one
Dr. Carter, I think we got oneYep, yep, we got one
We saved him, he's good, he's good
We got one, he's good
He's good, we got him, we saved him, he's a go, he's good
