

# Soundman (Hindsight )

[John Reuben](#)

(chorus)

Hey sound man turn me up man let it surround them  
Right here right now It's up to him to mix me in with my vocal blend from start to end  
No party crashin me and my fellow mc's we keep it smashin  
Enter the place and watch the crowd start reactin  
With the all shoot back up back up Mr. Sound Man turn my track up track up  
Even though I might be the act to open up  
Show me love dear friend please don't jack me up (chorus) Sound man I trust you  
It's a must to hop on your toys and raise the noise up  
To a volume that makes the people want to swoon free  
Up the music to consume the room  
'cause when it comes down to it  
All that we've got is MC's and DJ's  
And whether or not the man on the boards can afford to feel friendly  
To every mc never make the sound man your enemy (chorus) Big headed mc's and uptight bands all over the land  
They're ticking off the sound man  
Ego's on ten but in the same trend  
You've got sound folk who provoke and do it to them  
Not to mention the security guard who tries hard to be hard  
And takes his job a little too far  
And I understand your need for attitude  
But I don't see why we need to spare the gratitude  
So I'll be the first to say job well done  
Thank you sound man you're second to none I also speak on behalf of the DJ  
And on that note I feel we've earned the right to say (chorus)
