It's Written in the Stars

Paul Weller

It's written in the wind
That we're two
Carved out in the sand
That we're real
It's lit up in the stars
That we're true
We're destined in the sky
To be gladWe're hopelessly informed
That we're meant
We're conscious of the fact
That we're supposed
To be so sure
And we are
We're driven by the
Rain to actWe're suspect to the laws
Passed for real
When we're the realest
Thing we've seen
Taken by the hand from above
I really do feel
We work for loveAnd it's written in the stars
Meant for us
Soaked into the sand
Made by time
Taken by the hand from above
I really do feel
That we work for love
