

Knock Things Over

Pat McCurdy

Let's get together and knock things over
Let's get together and wiggle around
Let's get together and knock things over
I love to see things falling down

There goes the clock, a glass of water
We can't stop although we oughtta
'Cause we're gonna get a shock when the clock gets wet
Hey there goes the remote from the TV set

Let's get together and knock things over
Let's get together and wiggle around
Let's get together and knock things over
I love to see things falling down

There goes the lamp, there goes the table
The radio, the TV cable
And when this little bed starts to shake too much
Hey there goes an ashtray full of cigarette butts

And while this room goes up in flames
We're gonna shake the pictures right outta their frames

Let's get together and knock things over
Let's get together and wiggle around
Let's get together and knock things over
I love to see things falling down
