

Free Energy.

Free Energy

We're breakin' out this time
Makin' out with the wind
And I'm so disconnected
I'm never gonna check back in
We're gonna start a new life, see how it goes
Before we're tired and too slow
We'll never get any other life, there's too far to go
So together we make this whole, whoa, oh
Can you remember the moment?
Did you forget that time?
We were switchin' a ride in the car comin' back
Another Saturday night
You said there's nothing to wait for, there's nothing to know
We're never wakin' up if we never let it go
I said I wanna believe but I'm out of control
And I've got so far to go, whoa, oh
It's comin' out of the dark now
It's drippin' off my skin
It's on the tip of my tongue as I drift through my body
Into the city within
And now the people are breathin', the air is alive
It's comin' out of the street light
And now the battle is over whenever we decide
That there's nothing left to hide
This is all we got tonight
This is all we got tonight
We are young and still alive
Now the time is on our side
Right now, we'll make it right now
When every thought is electrical
Right now, we'll make it right now
The dream is coming in
You're gonna see how it works
You're gonna see it connect
You're gonna see 'em surrender, oh
But right now, make it right now
Or nothing's gonna change
And maybe we already know the way
Forever, every day
Do you know why the spirit's callin'
From mountain to see?
It reminds us we're alive this moment
Of who we are, what we could be
There's nothing to pray for, there's nothing to know
We're never wakin' up if we never let it go
The fever is comin', it's shakin' the ground
The city's alive so tonight we break out
It's comin' apart now, it's not too far
We'll never know why we arrive where we are
We'll never know why we bring the seed in these times
But if you wanna get high, kid, just open your eyes
This is all we got tonight

This is all we got tonight
We are young and still alive
And now the time is on our sideThis is all we got tonight
This is all we got tonight
We are young and still alive
Now the time is on our sideThis is all we got tonight
This is all we got tonight
We are young and still alive
And now the time is on our sideThis is all we got tonight
This is all we got tonight
We are young and still alive
