Kicking Down Doors

Santigold

Yeah, we kicking down the doors
You know we mean war
Who you looking out for?When we get in the game weather you gear up
Kick it however little you are and never get up
Kicking us and make it a war, make it real enough
Power watching light as a frisk like it, my dear
When it matters get the licking,
Others wishing it was more
We pitching and it's getting fast-forward
You look into the mirror, ask it if you gonna ball
I think this is the day we take it, take it all, yeahYeah, we kicking down the doors
You know we mean war
Who you looking out for?Never easy to say we the superior
Look at how you live in the back, in the posterior
Taking us we taking you up,
Leave you in dilemma
Tower when we take up the space like it when it matters
Take a look at others wishing they were more
We pitching and it's getting fast-forward
You look into the mirror, ask it if you gonna ball
I think this is the day we take it, take it all, yeahYeah, we kicking down the doors
You know we mean war
Who you looking out for?
