

# It's Coming

## Baxter

Sitting down considering  
If there's a way  
Of leaving you behind  
You're still here Wondering about you  
And what you could do  
To take away your pain  
I'm still here No one will approach because I show them  
That I will confirm what we've got And I keep talking to you  
Showing you what I'm about to offer you  
I'm still here but please tell me  
I'm someone you could be with now I see it's coming to me  
You're a part of me again  
It doesn't have to become  
This hard to go on.. I see it's coming to me  
(I see it's coming)  
You're a part of me again  
It doesn't have to become  
(I see it's coming)  
This hard to go on.. Tell me  
Say it soon  
Tell me  
I'm someone Thinking about what you have in mind  
And if you ever will be here beside me  
Waiting though you just decided I am  
Nowhere you could be with now  
I'm still here Thinking about what you have in mind and if you ever will be here  
Beside me  
Waiting though you just decided I am nowhere you could be with now  
I'm still here No one can approach me  
Cause I show them that I will confirm  
What we've got and I keep talking to you  
Showing you what I'm about to offer you I see it's coming to me  
You're a part of me again  
It doesn't have to become  
This hard to go on.. I see it's coming to me  
(I see it's coming)  
You're a part of me again  
It doesn't have to become  
(I see it's coming)

This hard to go on..
