

It's My Life

Bo Bice

Looking out the airplane window
Thirty thousand miles of shadow
All the silver linings bend into the night
Never any hesitation, never any explanation
I wish I had a ticket of this flight Everything keeps moving fast
What I want is what I have
Right now, Im closer than I thought I could be Its my life, my time to find the answers
Dont always know, what kind of road is in front of me
But Ill go slow, wanna remember every moment
That passes by the goodness ride has ever been
Its my life In times I really miss my family
I wonder what they're doing right now
I know they're thinking of me
I cant imagine where Im going
But I know where it is I come from
And it makes me feel complete Everything keeps moving fast
What I want is what I have
Right now, Im closer than I thought I could be Its my life, my time to find the answers
Dont always know what kind of road is in front of me
But Ill go slow, wanna remember every moment
That passes by the goodness ride has ever been
Its my life, its my life And its a real good fight trying to find whats mine
Tryin to be who Im supposed to be Its my life, it's my time to find the answers
Dont always know what kind of road is in front of me
But Ill go slow, wanna remember every moment
That passes by the goodness ride has ever been Its my life, my time to find the answers
Dont always know what kind of road is in front of me
But Ill go slow, wanna remember every moment
That passes by the goodness ride has ever been
Its my life
