

# Overflow

## Quanta

Step by step decent from where I am would seem a better plan than falling in

Emotion overflowing now

Don't you waste it

I'm falling far...too late

This over flow is too much to take

I'm falling far...too late

So cut it up...afraid?

It's just another trip anyway

I'm falling far...too late

Watching you go down constantly draining me

Show me how you seem to be weakening

Up until now what's all been said is just a lie to cover up all the times that you've made me

Pay. Bleed. Breathe. Bleed and breathe.

You cloud my mind all the time.

Separate the sky from ground where I will stay internally until high tide

The ocean's overflowing now

Can you taste it?

So cut it up...afraid?

It's just another poison to take

I'm falling far...too late
