

White (EP Version)

Lights

White, white, white, white
White, white, white, white Are there oceans full of things you never say?
Are there skylines of the cities you dont see?
Is there music muted playing underneath?
Is mathematics keeping you from thinking free? Do you see lights?
Turn your shadows white White, white, white, white
White, white, white, white Dont let rain clouds
Cry at all of your parades
Let the other side of darkness kiss your face Into the sea, into the sea Do you see lights?
Turn your shadows white Do you feel bright?
Turn your shadows white All the things I want to say
All the shadows in the way Do you see lights?
Turn your shadows white Do you feel bright?
Turn your shadows white White, white, white, white
White, white, white, white
