

Love, Liberty, Disco

Newsboys

And if I told you there's somebody who loves you
Would you say, "Hey, show me that face?"
And if I told you that true freedom was actual
Would you say, "Hey, take me to that place?" And if I said there is a family
A body that moves as one
Do you feel the love that invites us, liberty excites us?
The disco has just begun, has just begun Give me love, give me liberty, disco
The place everybody in the family's found
On that day, we will all be happy people
When love, liberty, disco's in town And as we step into the light of the lover
We're all the same, there's no rich or poor
And you know it's never been good for a man to be alone
So come on in, your name's on the door, what are we waiting for? Give me love, give me liberty, disco
The place everybody in the family's found
On that day, we will all be happy people
When love, liberty, disco's in town All our fears are turning 'round
Fall down, and meet your maker
Where our true selves will be found
Calling out to every lonely soul Give me love, give me liberty, disco
The place everybody in the family's found
On that day, we will all be happy people
When love, liberty, disco's in town Oh, give me love, give me liberty, disco
The place everybody in the family's found
On that day we will all be happy people
When love, liberty, disco's in town
