I Swear

Ezemdi

Girl I swear girl I swear
All you ever wanted was for me to be there
Take you out and show you that I still care
Cook your favorite meal when the kids were not there
Be more affectionate when when you tell me that you love me

Girl I swear I'm going to do more
To show the love I have
Girl I swear nothing in my life matters
If I can't share it with you

Now I'll run your bath water
And ask you how your day was
Did you get the promotion
Don't worry babe it's not your fault
No just lay and relax
While massage your tired feet
Feed you grapes and strawberries
Sing to you as you fall asleep

Girl I swear I'm going to do more
To show the love I have
Girl I swear nothing in my life matters
If I can't share it with you

Here lay the keys to my heart
I should have gave you me from the start
To show that I love you

Girl I swear I'm going to do more
To show the love I have
Girl I swear nothing in my life matters
If I can't share it with you
