

Making Love

Never Shout Never

I know your love is true
It's not just sex for you
It's the first time that I felt this way in a long time
And it's something I could get used to
It's love, it's love, it's true
When I'm making love to you
It's not just teenage lust
Or trying something new it's love,
But we're too young to follow through
Her heart is made of gold
These past two years
I've grown so cold
At the thought of trying out a different lover
Now I know, I could never love another
It's love, it's love, it's true
When I'm making love to you
It's not just teenage lust
Or trying something new it's love,
But we're too young to follow through
With all the plans we made
Travel all the world
And drink our cares away
What a happy day, if only I could say
That she would be my lover, from now until forever
It's love, it's love, it's true
When I'm making love to you
It's not just teenage lust
Or trying something new it's love,
But we're too young to follow through
