

You Speak My Language

Collective Soul

All around the world
Everywhere I go
No one understands me
No one knows
What I'm trying to say
Everywhere I go
No one understands me
They look at me when I talk to them
And they scratch their heads
They go, "What's he trying to say?"
(What's he trying to say?)
But you
You speak my language
Yea you
You speak my language
All around the world
Everywhere I go
No one understands me
No one knows
What I'm trying to say
Even in my hometown
My friends make me write it down
They look at me when I talk to them
And they shrug their shoulders
To see what's he talking about
But you
You speak my language
Yea you
You speak my language
Yea
Yea you
You speak my language
Yea you
You speak my language
Not understanding
When I speak my language
(Not understand)
Not understanding
When I speak my language

(Not understand)
Not understanding
When I speak my language
(Not understand)
Not understanding
When I speak my language
(Not understand)
Yea you
You speak my language
Yea you
You speak my language
Yea you
You speak my language
Yea you
You speak my language
(Yea)
