

# Aggressive Opposition

## All That Remains

Let us defy  
Let us defy Unite my friends, defy  
Heed failure's lesson  
And shape our future  
Make us transformed Revolt and smash the shackles  
The crisis brings us together  
Let us defy No more deception  
There's no safety  
Lest you make your own way Our dreams are what we are inside  
And when we close our eyes  
We see our future Their plan will lead you to failure  
Embrace this wisdom, let this wash away  
And knowledge drives our choices  
If we possess we sustain No more deception  
You must make your own way Our dreams are what we are inside  
And when we close our eyes  
We see our future No longer will we compromise  
Our fate is not defined  
By right we choose it Oh, now we're jaded  
We come back to one  
And find our way without giving up our hearts Oh, now we're jaded  
We come back to one  
And find our way without giving up our hearts Our dreams are what we are inside  
And when we close our eyes  
We see our future No longer will we compromise  
Our fate is not defined  
By right we choose it Our dreams, our future  
(Let us defy, let us defy)  
Our dreams, our future
