

Whisper Your Name

Human Nature

Baby I know you've been missin' me
(And he knows you've been plain' aound)
We make a special kinda of chemistry
(Every time you've been comin' around)
Oh if it's so wrong to be lovin' you
(Why does it feel so good to me?)
Baby tell me what I gotta do
(To lay it down and to make you believe) We rocked the cradle, let it fall
Leave him now or lose it all
We got somethin' special that we won't find again
'Cause every time I lie with you
Babe he knows you're lyin' too
Tell me who's lovin' you CHORUS
Does he whisper your name
Can he love you like this?
Does he love you the way that I love you baby?
Does he ever whisper your name?
Can he love you like this?
Does he love you the way that I love you baby? I never thought I'd be doing' you
(But I heard you were diggin' on me)
Can't you see what we got into
(It's not a fling you can get up and leave)
You had the time baby - I have the place
(So we could get it on)
Baby, turn around and show your face
('Cause it's time that you let him see) We rocked the cradle - let it fall
Playin' me you risked it all
Baby we made lovin' like we won;t find again
'Cause every time I lie with you
Babe he knows you're lyin' too
Tell me who's lovin' you CHORUS x2 (Look at me now) I swear that I'm for real
(Gotta believe) That I'll love you like no other, baby
(Now is the time) Time to tell him goodbye
No-one else can love like I do
(No-one else loves you the way that I love you) CHORUS TO FADE
