Fools Like Me

Lisa Loeb

Everybody go, the party's over
I want to be alone in my head
In my bed tonight you never show
You must really love her
You think I don't know but I do

Yeah it's true, I think over is overI'm right back where I started (When it comes to wanting you)

I can't have what I wantedBut I did, I can, I was

I am only human, living, dying

Just like any fool who ever breathed

If love is blind, if love's a drug

Always is it, always was and

Love was surely made for fools like meI know where I'm going I'm tripping I'm sliding around that's okay

At least I'm excited

It wasn't how I planned it

(Wasn't how I planned it feet are where I landed)

(At least I understand it now)

My feet are where I landed

(Feet are staying on the ground)But I did, I can, I was

I am only human, living, dying

Just like any fool who ever breathed

If love is blind, if love's a drug

Always is it, always was and

Love was surely made for fools like me

Fools like me

(Fools like me)I did, I can, I was

I am only human, living, dying

Just like any fool who ever breathed

Maybe it's the sanest thing

Or just the sweetest kind of dream

But love was surely made for fools

(Love was surely made for fools)

Love was surely made for fools

(Love was surely made for fools)

Love was surely made for fools like me
