Disappear

Porcupine Tree

We made the world believe we didn't care
We gate crashed parties and just stood and stared
We moved to London and stayed in all year
Standing next to you I disappearYou made a choice for us to live it up
I've got a voice inside me saying give it up
Let's get out of here, let's find a new career
You be famous, I'll disappearDisappear - I erase myself againI need security, you favour chance
I ponder everything, you advance
You bring the world to me and I just sneer
In your shadow I disappear
