

This Day We Fight!

Megadeth

For this I was chosen because I fear nothing
With confidence I tread through the dead of night
Off to another war torn faraway battlefields
Wherein lies a demonic enemy horde
On this day I decide to anoint my fist
Engaging them in the mode of power and war
Stopping at nothing just short of fulfilling my destiny
Willing to die in my will after you for what I believe
A desperate revenge is striking fear in their hearts
Invading their dreams before the day even starts
Wet with your blood I sharpen my sword
No turning the other cheek like a coward
Come tomorrow I may lay down and die
But not this day
Sent on an unholy quest to reduce all those who resist
[Incomprehensible] souls
[Incomprehensible] Vanquish the strangle horse that the netherworld sent for me
The last request of my life is to die killing my enemies
Bathed in blood up to my horses bridle
It's death to retreat, there's no chance of survival
Wet with your blood I sharpen my sword
No turning the other cheek like a coward
Come tomorrow I may lay down and die
But not this day
This day we fight
This day we fight
This day we fight
Stripped of fallen heroes
[Incomprehensible] are wounded
Collect the spoils of war and send them the dead
This day we fight
This day we fight
Fight, fight, this day we fight
Fight, fight, fight, this day I fight
