Remote Control

Watt Nicoll

In the Hamilton? election, twenty thousand did agree
To vote for me and the SNP, to set our Scotland free
And its down with the English ?????????? on the dole?
Let Scotland be ruled by SNP and not by remote control?

And for London im away, im away to make those English pay
For the years of toil and the good Scots soil, they've used for their on way
And its down with the English ?????????? on the dole?
Let Scotland be ruled by SNP and not by remote control?

And these other Scottish MPs, be they Labour or Tories men
They best support our Scottish vote if they want returned again
And its down with the English ?????????? on the dole?
Let Scotland be ruled by SNP and not by remote control?

I may just be a lonely voice, one against our foe
Ah but they will squirm if I stand firm and am joined by a hundred more
And its down with the English ?????????? on the dole?
Let Scotland be ruled by SNP and not by remote control?
