

Medicine Man (Demo)

Pantera

Many distant miles away
Past the shores of ever dark
There stays a magic man
Who bears an evil mark
He helps all concerned
Those who come again return
Injecting lies while fires burn
The devil's heart
With angel's words Have you wondered
What heaven's like?
She can show you in one night
Overwhelming with euphoric lift
To lure you to steal your gift Intoxication
Seeping down to the bone
And there's no question
To where you have to go Understand, just take his hand
He's the medicine man Understand, just take his hand
He's the medicine man Once proud and fearless men
With desire in their eyes
Lost strong and fruitful lives
To self-indulgent ties
Their souls were dipped in venom
Then put into a box
Then placed upon a crowded shelf
Where countless souls now rot Have you ever wondered what hell's like?
He can take you there
Just one taste and you'll be back
And by the high you'll swear Intoxication
Seeping down to the bone
And there's no question
To where you have to go Understand just take his hand
He's the medicine man Understand just take his hand
He's the medicine man Understand just take his hand
He's the medicine man Understand just take his hand
He's the medicine man
