Shine

Over It

Stretch past the edge and now I feel like breaking
My back against the wall
There's little left and nothing is here to faze me
Still summer fades to fall
When the meaning feels so far from healing it's still my one cure, allStill dreams collide where words can't describe
All the distance waiting outside
Will we burn that bridge when we come to it?
We'll let our light shineSo stay with me where whispers suffice
To say all the secrets we hide
Will we burn that bridge when we come to it?
We'll let our light shineLet's paint the town a thousand conversations
So many names to know
Drift through the crowd and take my hand to go now
I've got to let you know
A thousand lights shine in the valley below
We're still the brightest star, my brightest starStill dreams collide where words can't describe
All the distance waiting outside
Will we burn that bridge when we come to it?
We'll let our light shineSo stay with me where whispers suffice
To say all the secrets we hide
Will we burn that bridge when we come to it?
We'll let our light shineDon't you love the way a little quiet solves everything
When you can't help wondering how's it gonna be?Stretch past the edge and now I feel like breaking
My back against the wall
There's little left and nothing is here to faze me
Still summer fades to fall
When the meaning feels so far from healing it's still my one cure, all
My one cure, allStill dreams collide where words can't describe
All the distance waiting outside
Will we burn that bridge when we come to it?
We'll let our light shineSo stay with me where whispers suffice
To say all the secrets we hide
Will we burn that bridge when we come to it?
We'll let our light shineSo stay with me where whispers suffice
To say all the secrets we hide
Will we burn that bridge when we come to it?
We'll let our light shine
