

# Room for Me

Ty Tabor

I like feeling loved  
But only by you  
Without that in my life  
Sometimes it feels like everything is through

And I like spending time  
Just knowing you are near  
And I wish I could feel you now  
I wish that you were here

I love the ocean - All because of you  
And I hope with every breath I take  
You've got room for me

I used to watch you sleep  
I'd lay there all the time  
And I would whisper in your ear  
And I'd thank god that you were mine

If I could turn the clock back  
I'd make sure you were awake  
You'd never doubt how much that I love you  
And you'd never have to wait again

I love the ocean - All because of you  
And I hope with every breath I take  
You've got room for me  
Room for me

I like believing there's a chance  
That someday you could feel  
The love that you once held for me  
And the wound that I gave you would heal

I love the ocean - All because of you  
And I want you with me in the end  
I just can't see it without you

I love the ocean - And I love you  
And I hope with every breath I take

You've got room for me

---
