

It's All the Same

Adrienne Young

Its All the Same
Adrienne Young / Will Kimbrough One foot in front of the other
Is hard as hell these days
Its my choice, a case of any color
What makes me walk away? One thought after another
Round and round they go
Ive got to sit still, try to recover
Breathe into what I know I know theres one god above us
And that god made everything
And it dont matter how you worship
How you see the clothes he wore
Its all the same
Its all the same One truth over another
My pride your misery
Wrought this land from the hand of a brother
In the name of Liberty Granddaddy fought, fought in the big war
While they went without at home
We sacrifice driving in our big cars
Chariots of modern Rome I know theres one god above us
And that god made everything
And it dont matter how you worship
How you see the clothes he wore
Its all the same
Its all the same One war after another
Blind to history
Those to come, will they forgive us?
For this waste of life and energy One day after another
Waiting for the Son
We stake it all on the coming of a savior
Wholl right all the wrong weve done I know theres one god above us
And that god made everything
And it dont matter how you worship
How you see the clothes he wore
Its all the same
Its all the same
