Omega Wave

Forbidden

The crest of the wave is crushing human kind
Rolling with ungodly force, omnipotent omega
Delivering the pain, condemning one and all
Eradicate the conscious stricken, everyone must dieSlaves to the fear we've created out impending doom
Avoiding the warning we've turned a blind eye to the truthThe message re-conveyed, distorted in translation
Prophecies are re-deranged, manipulate the massesSlaves to the fear we've created our impending doom
Avoiding the warning we've turned a blind eye to the truthOmegaForced to live despair, life abandoned
Voices unheard in white noise forgotten
Caught in the web of disinformation
Pulling us down underneath our redemptionSlaves to the fear we've created our impending doom
Avoiding the warning we've turned a blind eye to the truthOmega
