

Stars

Sixx:A.M.

Do you wanna go to heaven tonight?

Leave the evidence far behind?

Say alright

Alright

Do you wanna be my lover tonight?

We could leave everybody else behind

Say alright

Alright

Do you wanna see heaven tonight?

Underneath those lights

You will look so beautiful

Do you wanna see the stars before they fall?

See the stars before they fall

Do you wanna be my love tonight?

And for all my life

It could be so wonderful

Do you wanna see the stars before they fall?

See the stars before they fall

Maybe we should just run away

Never look back is the world decay

Say alright

Alright

Nothing matters ever since the day

You pulled the pin on my heart like a hand grenade

Say alright

Alright

Do you wanna see heaven tonight?

Underneath those lights

You will look so beautiful

Do you wanna see the stars before they fall?

See the stars before they fall

Do you wanna be my love tonight?

And for all my life

It could be so wonderful
Do you wanna see the stars before they fall?
See the stars before they fall

Before I love this atmosphere let's run
Run until we disappear and
Never let them come and catch us
Never let them take away a star

Do you wanna see heaven tonight?
Underneath those lights
You will look so beautiful
Do you wanna see the stars before they fall?
See the stars before they fall

Do you wanna be my love tonight?
And for all my life
It would be so wonderful
Do you wanna see the stars before they fall?
See the stars before they fall

Before they fall, before they fall
Before they fall, before they fall
Do you wanna see the stars before they fall?

Before they fall, before they fall
Before they fall, before they fall
Do you wanna see the stars before they fall?
