

# I Can Hear You

[Alchemix](#)

I can hear you by They Might Be Giants  
Made at the Edison laboratories  
Two three four  
I can hear you just barely hear you  
I can just barely hear you  
This is a warning, step away from the car  
This car is protected by viper  
Guess where I am? I'm calling from the plane  
I'll call you when I get there  
You won't hear a buzz but I'm buzzing you in  
I'm buzzing you in  
What's your order? I can super size that  
Please bring your car around  
I can hear you, just barely hear you  
I can just barely hear you
