Lashing Out

The British Expeditionary Force

the sound of right now hides underground
i know
the story untold is better than gold
i know
so we try to explain
name to the pain
i know
but it never seems to sink in
so at the top of my lungs to the tips of their tongues
i know
smile and sing along to every single song
i know
fire in their eyes works everynight
i know
so this is ours forever and ever
before we calm down we're lashing out
before we come home we're lashing out
so the pretty coy boys make the sweet noise
i know
and we all site and listen with delicate precision
i know
but we're just so tired at the end of every night
i know
we're unsatisfied and never even tried
before we come home we're lashing out
before we calm down we're lashing out
june you send me
honest you do
so at the top of my lungs to the tips of their tongues
i know
smile and sing along to every single song
i know
from the top of my lungs to to tips of their tongues
i know
so this is yours forever and ever
before we calm down home were lashing out
before we come home we're lashing out
