

# Can't Force Love (Interlude)

## Case

My love, it's been so many moments since we touched  
Been so many emotions since the last time we kissed  
Just can't seem to heal The time, the pain just hides deeper in my heart  
And the loneliness just keeps on growing  
But I do miss you, I do, I mean it, I miss us And I realize now that everything I did was just wrong  
And you can't make a man love a woman  
You damn sure can't make a woman love a man
