

BWU

Tegan and Sara

I love you,
I don't need a ring to prove that you're worthy,
you're under my skin
It's easy, I don't need a lock to prove that you trust me
I walk the walk to be with you, just to be with you
Oh, to be with you, just to be with you Save your first and last dance for me
I don't need a white wedding
Save your first and last born for me
We don't need a white wedding
All the girls I loved before
Told me they'd signed up for more
Save your first and last chance for me,
'cause I don't want a white wedding I told you I struggled to stay before
And I worried about letting you in
It's easy how quickly the false starts end when I'm happy
I stop the clock to be with you, just to be with you
Oh, to be with you, just to be with you Save your first and last dance for me
I don't need a white wedding
Save your first and last born for me
We don't need a white wedding
All the girls I loved before
Told me they'd signed up for more
Save your first and last chance for me,
'cause I don't want a white wedding
