I Know You Tried

Luna

I went to your street
At seven in the mornin'
And while you were asleep
I read your newspaperI saw you out walkin'
Out walkin' with your father
Pretendin' not to see me
Pretendin' to be a familyI know you tried, baby
I know you tried
I know you tried to go onSaw a metal object
Lyin' in the street
And when we turned away
It stood itself upYou circled the island
In a Chevy caprice
You stuck out your tongue
And your nose began to bleedI know you tried, baby
I know you tried
I know you tried to go onI know you tried, baby
I know you tried
I know you tried to go on
