Bring It On Home

Little Big Town

You got someone here

Wants to make it alright

Someone who loves you

More than life right here You got willing arms

That'll hold you tight

A hand to lead you on

Through the night right hereI know your heart

Can get all tangled up inside

But don't you keep it to yourselfWhen your long day is over

And you can barely drag your feet

The weight of the world is on your shoulders

I know what you need, bring it on home to meYou know I know you

Like the back of my hand

But did you know I'm gonna do

All that I can right here?I'm gonna lie with you

Till you fall asleep

When the morning comes

I'm still gonna be right here, oh yes I amSo take your worries

And just drop them at the door

Baby leave it all behindWhen your long day is over

And you can barely drag your feet

The weight of the world is on your shoulders

I know what you need, bring it on home to meBaby let me be your safe harbor

Don't let the water come and carry you awayWhen your long day is over

And you can barely drag your feet

The weight of the world is on your shoulders

I know what you need, bring it on home to meOh bring it on home

Yeah bring it on home to me

Home to me

Oh bring it on, bring it on

Home to meYou got someone here

Wants to make it alright

Someone who loves you

More than life right here
