

Leave All the Heartache to Me

[Kitty Wells](#)

If two other lips are what you long for if our love is melodrama that just can't be
Go on out with someone else enjoy living and leave all the heartache to me
I'll stay home and count the teardrops while you go out at party
I'll envy you for being so carefree
You can laught and love with her and be contented and leave all the heartache to me
[fiddle - steel]
Don't think upon our romance as a failure don't hate yourself for wanting to be free
Just look forward don't look backward and be happy and leave all the heartache to me
I'll stay home and count the teardrops while you go out and party
I'll find comfort in a few old memories
You can laught and love with her and be contented and leave all the heartache to me
