

What's Stopping You

Emery

I wanted to sit out of this one but my God you're so convincing
I said I would and I meant I'd try but with a wealth of doubts came a mouth full of lies
(I said that I would, and I meant every word but it took the ending)
I sank my teeth in the kingdom come and spit out my years and held back my tongue
(And all that I heard, from the foot of my bed this was just the beginning) Make this your business what I am
about to say
The last touch between us took this all the way Don't believe for once that I could let this go away
It's right behind, these eyes of mine even if I stay And I wanted to fix this like you fixed my name to this I said I
would and I meant I'd try but with a wealth of doubts came a mouth full of lies
I sank my teeth in the kingdom come and spit out my years pulled back my tongue Forget the wasted time we've
made it
The stars are out just in time to see
The dark retreating and shadows fleeting
We found the ground beneath our feet
What's stopping you (What's stopping you)
What's stopping you don't let this in
What's stopping you (What's stopping you)
What's stopping you can't stop all of this These clumsy arms can't be the first
Distance your regrets is what I've heard You sit there with a pardon like a present
Oh my soul
Those words I guess I'm never gonna be alone
But I'm on my own Don't believe for once that I would let this go away Forget the wasted time we've made it
(I knew it right away)
The stars are out just in time to see
(This would break all of their hearts)
The dark retreating and shadows fleeting
(I couldn't stay away)
We found the ground beneath our feet
(A good person always plays their part)
What's stopping you (What's stopping you)
What's stopping you don't let this in
What's stopping you (What's stopping you)
What's stopping you can't stop all of this Always wanted to say that I would be the first
From the ground to the table I planned and rehearsed
To be there at the moment to capture my name
But it's yours and not mine and it's yours that he made Lift up your hands it's surrender or praise
So you burn all your plans for the words you believed
The nails you learned to drive between
The wood and earth that made you see

That simple men of simple means
Can hold the heavens in their hands
Second place I find here
(I've always known my part)
The upper case is yours not mine
(But I would love to see this through)
Teach these hands to have fear
(Could we go back to the start)
Orchestrate my words and lines
(When it was just me and you)
But I never said I wanted any of this, I never said no
