

We're Everything to Me

Sawyer Brown

Standing on the corner and unsuspecting

My heart out left unprotected

You walked in, right at home

Didn't take long for me too knowWe're the best thing that ever happened to me

We're everything, everything

Only took you for me to see

We're everything to meAtta hear 'em talk about our condition

Lost in love beyond recognition

When I see you, I see me

We don't say I girl, we say weWe're the best thing that ever happened to me

We're everything, everything

Only took you for me to see

We're everything to meWe're the best thing, the best thing

We're everything too meWe're the best thing that ever happened to me

We're everything, everything

Only took you for me to see

We're everything to meWe're everything, everything

We're everything too me

We're everything, everything

We're everything too me

We're everything, everything

We're everything too me
