

Makebelieve

Miss Vintage

I saw the wounded ashes
Falling into the snow that
Lit her face when she,
She walked by
The glance that took my breathe,
A lapse in my despair

Oblivious to my condition
She disappeared into the night
No trace or remnants left behind
The spaces I would fill
To soothe my restless heart

Apart from her, the world is colder
I've waited here on hands and knees
For just a glimpse
Of her is all I need, all I need

When the snow has vanished
And these steps are no more
Will you preserve this makebelieve moment
Before you see it's not makebelieve

When all the joy has left you,
You will find me standing there beside
Because the night is ending just beyond this,
Please believe me
