No Medicine

Sense Field

I turn to you to make it through
Just to make it through the night
You don't take long to turn it on
To make me feel alright
When you show up
I throw you up
Completely out of our minds
I crawl to you
When the night is through
And when the world is too unkindThe drugstore is closed
I bet there's someone who knows[Chorus]
But no medicine will take away the pain this time
No Medicine
And no medicine will hide me from the pain inside
No MedicineI realize I anesthetize
To cover up for so many lies
I'm not all right for tonight
I never think of losing a fight
Then you come around
And I'm tied and bound
Leading to a hole in the groundThe drugstore is closed
I bet there's someone who knows[Chorus]And no medicine will take away the pain tonightSo many different ways to deal
With the loneliness you don't want to feel
The sinking feeling you're all alone
Is the hardest thing that you'll ever knowThe drugstore is closed
I bet there's someone who knows[Chorus]And no medicine will take away the pain tonightSo many different ways to deal
With the loneliness you don't want to feel
The sinking feeling you're all alone
Is the hardest thing that you'll ever know
