Fall

Berlin

Where do you go from here? The sun is shining
Look into a night time sky, a star is calling
As seasons change, why are you so afraid?
In darkness you'll see a new light
Fall, fall in love
Fall, fall in love
You know I can't read your mind, if never spoken
Tell me if it hurts too much, the door is open
Colors around, smile, cry then laugh out loud
Feel the autumn breeze come alive
Fall, fall in love
Fall, fall in love
Where do we go from here? I'll stay be your side
And if you choose a different path we'll say, "Goodbye"
Open your heart, a shooting star could shine and touch you
Here comes the light, your star will shine again
Fall, fall in love
Fall, fall in love
Fall, fall in love
Fall, fall in love
Your star will shine again
Your star will shine again
Your star will shine again
