

# District of Misery

## Oceano

We are the antidote  
and also the disease

we're the oppressors who  
posses marks of the beast

Mankind deserves this  
A catalyst for desconstruction

A scapegoat to hold humanity on its knees  
growllllllllllllllll

A self inflected social anarchy to frighten the the population to submission  
Intricate color schemes on TV hypnotize them while they sleep  
And from behind the scenes inject a fatal dose of misery

So let these structures fall  
As buildings crumble  
Watch this metropolis transform to ruins

we have no symphaty victims lungs overflown with debris thei fractured bones exposed

Lacerated is their skin

This is a demonstration in the clout of goverment  
Failure to conform equals destruction,

At the end of this world we hold all the answers  
at the end of this world you'll posses only misery.
